Technical Risks:

- Risk: The software development team may face technical challenges in integrating the digital card solution with Google Maps or developing a user-friendly interface.

- Response: The team should conduct thorough research and testing to identify potential technical challenges and develop plans to address them.

Communication Risks:

- Risk: Communication breakdowns between team members could lead to misunderstandings, delays, and errors.

- Response: The team should establish clear communication channels and guidelines, hold regular team meetings, and document all communication

Data Privacy and Security Risks:

- Risk: The digital card solution may be vulnerable to data risks.

- Response: The team should also conduct regular security testing to identify and address any vulnerabilities.

Resource Risks:

- Risk: The project may face resource constraints, such as limited funding or staffing.

- Response: The team should develop a realistic project plan and budget that takes into account available resources should monitor resource usage and adjust the plan as necessary to ensure that the project stays on track.
